

Progress Report on Action Steps

Indigenous Community Social Determinants of Health (SDOH) Research

External Research:

- Michele Battle-Fisher, She/Her, Associate Director of Research, and her team retrieved several relevant academic reports on Indigenous communities and Social Determinants of Health.
- These have been reviewed by the workgroup leads to inform the approach and direction of the work. Although these articles are informative, through conversations with the Indigenous community, we recognize that the needs of some may not be the needs of all.
- Thus, we are ensuring our approach incorporates the voices of Indigenous people.

Indigenous Community Needs Analysis Research

Internal Research:

The Quality team ran a comprehensive report on Equitas Health patients who identify as Indigenous to inform passive and active outreach efforts.

More information will be available as the consultancy relationship progresses.
